

The Conductive Joint allows the mechanical connection and the electrical connection between two tracks.

The insulating joint allows the mechanical connection between two tracks allowing electrical separation in several sectors, each of which must be in turn powered.

Linear coupling

It is housed between the two tracks

200

19020 White conductor
19021 Black conductor

19022 White insulator
19023 Black insulator

Net weight Kg 0.12

IP20 CE
